Creación de CLOUDTRAIL

Dashboard > Create trail

Step 1
Choose trail attributes
Step 2
Choose log events
Step 3
Review and create

Choose trail attributes

General details

A trail created in the console is a multi-region trail. Learn more

Trail name
Enter a display name for your trail.
Lab-CloudTrail-Yennyfergomez
3-128 characters. Only letters, numbers, periods, underscores, and dashes are allowed.

Enable for all accounts in my organization
To review accounts in your organization, open AWS Organizations. See all accounts

Storage location | Info

Create new S3 bucket
Create a bucket to store logs for the trail.

Use existing S3 bucket
Choose an existing bucket to store logs for this trail.

Trail log bucket and folder
Enter a new S3 bucket name and folder (prefix) to store your logs. Bucket names must be globally unique.
aws-cloudtrail-logs-654654478122-ce2cd270
Logs will be stored in aws-cloudtrail-logs-654654478122-ce2cd270/AWSLogs/654654478122

Log file SSE-KMS encryption | Info
Enabled

Customer managed AWS KMS key
New
Existing

AWS KMS alias
Enter KMS alias
KMS key and S3 bucket must be in the same region.

Additional settings

Log file validation | Info

Choose log events

Events Info

Record API activity for individual resources, or for all current and future resources in AWS account. Additional charges apply

Event type
Choose the type of events that you want to log.

Management events
Capture management operations performed on your AWS resources.

Data events
Log the resource operations performed on or within a resource.

Insights events
Identify unusual activity, errors, or user behavior in your account.

Network activity events
Network activity events provide information about resource operations performed on a resource within a virtual private cloud endpoint.

Management events Info

Management events show information about management operations performed on resources in your AWS account.

Multiple management events trails detected. Charges apply to duplicated logged management events. Additional charges apply

API activity
Choose the activities you want to log.

Mensaje donde se informa que la CPU de la EC2 superó el 80%

You are receiving this email because your Amazon CloudWatch Alarm "Alarma de mi EC2-YennyferGomez" in the US East (N. Virginia) region has entered the ALARM state, because "Threshold Crossed: 1 out of the last 1 datapoints [98.55833333333334 (21/02/26 02:31:00)] was greater than the threshold (80.0) (minimum 1 datapoint for OK -> ALARM transition)." at "Saturday 21 February, 2026 02:36:34 UTC".

View this alarm in the AWS Management Console:
https://us-east-1.console.aws.amazon.com/cloudwatch/deeplink.js?region=us-east-1#alarmsV2:alarm/Alarma%20de%20mi%20EC2-YennyferGomez

Alarm Details:
- Name: Alarma de mi EC2-YennyferGomez
- Description: La CPU de este servidor supero el 80%
- State Change: OK -> ALARM
- Reason for State Change: Threshold Crossed: 1 out of the last 1 datapoints [98.55833333333334 (21/02/26 02:31:00)] was greater than the threshold (80.0) (minimum 1 datapoint for OK -> ALARM transition).
- Timestamp: Saturday 21 February, 2026 02:36:34 UTC
- AWS Account: 654654478122
- Alarm Arn: arn:aws:cloudwatch:us-east-1:654654478122:alarm:Alarma de mi EC2-YennyferGomez

Threshold:
- The alarm is in the ALARM state when the metric is GreaterThanThreshold 80.0 for at least 1 of the last 1 period(s) of 300 seconds.

Monitored Metric:
- MetricNamespace: AWS/EC2
- MetricName: CPUUtilization
- Dimensions: [InstanceId = i-034fb0838f48d8960]
- Period: 300 seconds
- Statistic: Average
- Unit: not specified
